## DB Sales Helps Sheraton with High Efficiency Equipment

When the Sheraton was ready to build a new luxury hotel in the historic San Gabriel Valley, they needed a reliable and energy efficient method to deliver heating and domestic hot water for its guests. DB Sales worked closely with the contractors and engineering team to engineer and design highly efficient systems that integrate free energy from the sun to reduce energy costs and provide green energy.

DB Sales recommended RBI Futera Fusion ultra-high efficiency condensing boilers for the hydronic heating. The RBI Fusion design provides an industry-leading 97.5% efficiency at AHRI conditions.

## Introducing KN-Series Plus High Efficiency Boilers

The new KN-Series Plus is a rugged and efficient high-mass boiler for hydronic heating. The KN-Series is one of the only high-efficiency boilers made of cast iron, which is the ideal material for condensing boiler systems for its longevity and minimal maintenance.

The KN-Series Plus model has increased the overall thermal efficiency in excess of 95%. The manufacturer also provides an unprecedented 25 year warranty on the heat exchanger.

Does your building have an old, leaky, or inefficient boiler? [Contact us today](#) to see if replacing it with an efficient KN-Series makes sense.

## Hospital Emergency, No Hot Water

A hospital in San Diego found themselves in an emergency no hot water situation. They called our service department and we immediately dispatched a senior technician to the jobsite to analyze their equipment.

The old heaters, which had not been serviced for years, had leaking and busted coils and the controls were shorted out. There was no quick repair feasible for the equipment, which was already beyond its life expectancy.

The techs at DB Sales & Service snapped into action by delivering and installing a pair of rental boilers within one day to keep the facility going until permanent replacements could be procured and installed.

The hospital has had reliable hot water for months with the DB Sales rentals, while they plan out the replacement phase of the project.
