

DB Sales Energy Rebate Service Helps Clients Find Utility Funds

March 1, 2014 GARDEN GROVE, Calif. – DB Sales, building on its decades-long expertise in developing energy efficiency product solutions, has announced an energy efficiency equipment rebate service.

The company has formalized its expertise in identifying utility energy efficiency incentive programs into a free service for its customers.

The company stays up to date on incentive programs offered by California utilities, including San Diego Gas & Electric, Southern California Edison, So Cal Gas, and the Los Angeles Department of Water & Power, and works to propose solutions that qualify for these rebates.

Among the most common products for rebates are high efficiency chiller plants, compressors, waste heat recovery, energy wheels, pumping solutions, air handlers, boilers, and air-side systems.

Steve Mertz, president of DB Sales, said, “It was a natural evolution to add an energy rebate service, because our company specializes in offering environmentally responsible and energy efficient products.”
